## Executive Summary

Primary sources include raw information and direct evidence about the people, events, or issues you are researching. It can be evidence of an event, data from a study or an original work. When you work with a primary source, you do your own analysis of the work in question.

## Reflection

In today's technologically advanced age, our best approach is to proactively prepare for the future. Waiting until the last minute is not a strategy for success; Perfection comes from careful and timely preparation. As technology continues to evolve, it is essential to be proactive and ahead of trends to meet the challenges and seize the opportunities that lie ahead.
